

Introducing EZ-GO Barges™

DESIGNED FOR MID-SIZE JOBS, EASY ACCESS TO SENSATIVE AREAS AND HARD TO REACH WORK SITES.

INTRODUCING EZ-GO BARGES.™

EZ-GO Barges are designed for mid size marine projects and built to provide access to areas often inaccessible by larger barges and cranes. These truckable barges are ideal for environmentally sensitive areas and shallow water access points.

NO NEED FOR CREWS AND CRANES.

EZ-GO Barges launch in just minutes. These barges are a great way to reduce your costs, time and liability. EZ-GO Barges can be configured to your specifications and delivered to your job site. In addition to design and engineering services—EZ-GO Barges will offer financing, leasing, rental, insurance, training, and customer support.

Call Mike or Greg at (651) 248-2864 and make your next job EZ.
